		POLICY 1	POLICY 2
		Law related to the control of dangerous, polluted and noxious installations	Law related to the protection of nature and of natural resources
Title (original language)			
Title (translation in english)		Law related to the control of dangerous, polluted and noxious installations	Law related to the protection of nature and of natural resources
Year (and identification number if available)		1990	1982
Short description		The Law of 1990 related to the control of dangerous, polluted and noxious installations has become the key legislation for new projects, including quarry operations. It sets out a discrete authorisation procedure, based on the concept of Best Available Technology (BAT). The legislation also makes provisions for greater public involvement in the decision-making process and increases owner liability.	The Law of 1982 covers the protection of nature and of natural resources. By referring to the Law of 1974, "Green zones" are being defined. In such zones, the start of mining or quarrying operations is subjected to the authorisation by the Minister responsible for Water and Forest (Chap. 2, Art. 4). The Minister can order an impact study, prior to his decision.
